

Modularity Billing System (MBS): BKD D365 Business Central Solutions

PROBLEM: Telecom Service Providers need industry-specific billing systems and powerful, integrated backend accounting systems with scalability and flexibility

SOLUTION: MBS + BKD's Microsoft Dynamics 365 Business Central

OVERVIEW

MBS, CDG's BSS/OSS solution for subscriber billing and management, now offers a full accounting suite, through an integration with Microsoft Dynamics 365 Business Central, powered by BKD. MBS will push core accounting data to D365 BC, and users can access the cloud-based system directly from the MBS application menu, just like other MBS modules.

ABOUT DYNAMICS 365 BUSINESS CENTRAL

D365 Business Central provides comprehensive ERP solutions and helps organizations connect their financials, sales, purchases, inventory, projects, services, and operations. Dynamics 365 Business Central functionality includes: accounting, HR, manufacturing, distribution, field service, sales, marketing, CRM, and business intelligence reporting.

FLEXIBILITY AND SCALABILITY

Businesses can start by addressing basic functions needed to operate with the options available through Microsoft's cloud-based solutions, and then easily integrate additional functionality as their business needs evolve. BKD offers two types of D365 BC licenses (Essentials and Premium), as well as other add-on functionality.

DYNAMICS 365 BUSINESS CENTRAL ESSENTIALS
